PRO BTP Group chooses Inetum's Cleva Insurance Solution software platform to modernize its Health and Welfare information system

PRO BTP Group, the 8^e biggest health and provident insurance company in France with more than 5,000 employees serving the civil-engineering and construction industry, has chosen the Cleva solution by Inetum, European leader in digital services and solutions, to upgrade the management of its contracts.

Following an in-depth review of the challenges and prospects for its provident and health insurance business, both in the group and in individual markets, PRO BTP Group decided to revamp its information system to improve its operational efficiency and offer an optimized experience to its members.

Having explored several avenues and consulted various players, PRO BTP chose Inetum Group's Cleva Insurance Solution as the technological base for its 4 million insured and managed customers in provident and health insurance. Cleva was chosen for its open ecosystem and the high configurability of its contract management platform, particularly for groups.

"As part of the revamping of our health and welfare management tools, we chose to integrate the Cleva solution as it fully meets our specifications: We will be able to manage all of our group and individual activities in a single, modular tool, with accelerated marketing. According to agreement, the Inetum teams will support us in a partnership approach to upskill our teams so that they can become autonomous in the medium term. This decision will allow us to continue serving and innovating to ensure optimal support of our members, companies, active and retired people, at each stage of their life," says Stéphan Reuge, Managing Director of SGAPS BTP and sponsor of the project.

"We would like to thank PRO BTP Group for choosing to work with Inetum and for putting their trust in our solutions to meet their specific needs. We look forward to supporting the group in its redesign programme and in its ambition to continue to serve the construction industry and anticipate new needs by offering dedicated insurance products and high value-added services," Rodolphe Peim, General Manager, Software Assurance & Finance at Inetum Software, adds.

About PRO BTP: *Health, providence, insurance, savings, retirement, vacations, PRO BTP is the leading professional group in social protection for companies, craftsmen, employees, apprentices and pensioners in the civil-engineering and construction sector. Founded to manage complementary social protection for the civil-engineering and construction industry, PRO BTP Group is administered by employer and employee representatives from the profession. Today, it is the 8th largest health and provident insurance company*

in France with 5,240 employees, providing health insurance for over 3 million people. PRO BTP is a partnership and not a capital company, with no shareholders to remunerate. Surpluses benefit its members, particularly in the form of improved guarantees and solidarity measures. As a committed and responsible player, the Group finances a large-scale social policy and invests in energy transition and technological innovation through projects related to prevention, health, construction and insurance. The Group's ambition is to protect and serve the civil-engineering and construction sector by anticipating its future needs.
