

Press release

Paris, 17th of September 2024

Inetum signs a partnership with Pelico to offer optimized management of factory supply chains and customer supply chains in Europe.

Inetum, the leading provider of digital services and solutions, announces its new partnership with Pelico, the SaaS platform for managing supply chain operations on the factory floor, enabling manufacturers to cope with the growing complexity of their operations and react with agility to the unpredictability of supply chains.

Inetum, with its proven supply chain expertise, combined with the Pelico platform, offers its in-depth knowledge in terms of change management and local proximity in the industrial sector to facilitate the deployment of the solution, while ensuring that all operational teams get the most out of it.

This collaboration with Pelico will enable industrial companies to benefit from faster and easier deployment of the platform for managing supply chain operations on the factory floor. The Pelico platform gives operational teams the agility they need to effectively anticipate production contingencies, simulate action plans, take corrective actions and collaborate to solve bottlenecks. Customers have seen significant improvements in their operational performance, including a 40% reduction in missing parts, a more than 60% increase in productivity, and a 15% improvement in on-time deliveries.

Emmanuelle Payan, General Manager of Inetum Consulting Group: *"Our company's ability to drive change and our expertise in processes and planning, combined with the Pelico platform, data analysis, artificial intelligence and operational research algorithms, enable us to offer a complete and effective solution with greater impact for industry customers, particularly in the aerospace and defense sectors."*

"Collaborating with Inetum, an expert in digital transformation, represents a concrete commitment to guaranteeing the successful deployment of our solution among our current and future customers. In concrete terms, it will enable us to ensure that Pelico users have the right level of training to make the most of the platform's full potential, and that our customers deploy Pelico in all their plants around the world."
Antoine Déroche, VP Global Partnerships at Pelico.

About Inetum

Inetum is a European leader in digital services. Inetum's team of 28,000 consultants and specialists strive every day to make a digital impact for businesses, public sector entities and society. Inetum's solutions aim at contributing to its clients' performance and innovation as well as the common good. Present in 19 countries with a dense network of sites, Inetum partners with major software publishers to meet the challenges of digital transformation with proximity and flexibility. Driven by its ambition for growth and scale, Inetum generated sales of 2.5 billion euros in 2023. For further information, please visit www.inetum.com

About Pelico

Pelico is a Paris-based scale-up founded in late 2019 by engineers with backgrounds in tech and industry. Its supply chain operations management software connects factory teams around data to enable them to manage day-to-day volatility and deliver their products on time and on budget. Thanks to the software,

factory teams can anticipate their bottlenecks in real time, react quickly with AI-assisted recommendations, and collaborate across teams on implementing corrective action plans.
